SUMMARY

Senior Frontend Engineer with 6+ years of professional experience developing high-scale FinTech and SaaS applications using React.js, Next.js, and TypeScript. Key contributions include raising Lighthouse scores from 45 to 95, automating GitLab CI/CD pipelines to halve deployment time, creating reusable type-safe component libraries and design systems used across five products, and mentoring junior engineers during sprint planning. These efforts reduced pull request cycle time by approximately 40 percent and lowered post-release defects.

PROFESSIONAL EXPERIENCE

Lead Frontend Engineer

Aug 2022 - May 2026

Aqaye Pardakht (Payment Gateway Platform)

Rasht, Iran - On-site

- Architected a reusable JSON-schema-driven React form builder for a payment platform serving 40,000+ users, reducing internal form creation time by 70% for 30+ complex dashboard configurations.
- Designed and executed a reusable WebSocket chat package (with lightweight Node.js backend) integrated into 5+ client products, slashing integration time from weeks to under 3 days.
- Drove admin panel performance optimization using code splitting, lazy loading, and React Profiler, boosting Lighthouse scores by 50+ points alongside daily feature development.
- Automated the entire GitLab CI/CD release pipeline from scratch, removing manual deployment steps and lowering deployment time by ~80%.
- Mentored 4 junior engineers through Agile sprint planning and code reviews, upskilling 3 of them to independent contributors without slowing down core feature delivery.

Senior Frontend Developer

Mar 2020 - Jul 2022

Dariche-zehn Web Agency (Software Solutions Agency)

Tehran, Iran - Remote

- Applied Atomic Design principles throughout React/Next.js platforms, creating a shared component ecosystem powering 8+ projects, resulting in faster development and higher code consistency.
- Replaced Redux Toolkit with Zustand, eliminating thousands of lines of boilerplate and accelerating new feature state integration by an estimated 25%.
- Created and maintained a library of 55+ type-safe TypeScript components distributed among 6+ projects, shortening per-project UI delivery time by ~35%.
- Defined technical roadmaps for 4+ FinTech and education clients, translating business goals into sprint-level engineering plans.

Frontend Developer

Jan 2019 - Jan 2020

Rivas System Pars (Software Solutions Agency)

Rasht, Iran - Remote

- Built responsive, mobile-first interfaces across 15+ projects and contributed to a shared React.js shop-builder framework powering 20+ client storefronts.
- Delivered 30+ optimized HTML5/CSS3 templates, accelerating client prototyping and minimizing project setup time.

Junior Web Developer

May 2018 - Nov 2018

Axell Accelerator (Guilan University Accelerator)

Rasht, Iran - On-site

- Developed and optimized a WordPress landing page for an Android game using SEO and performance improvements, resulting in a 30% increase in user acquisitions.

EDUCATION

Islamic Azad University

2015 - 2019

B.Sc. Software Technology Engineering

Score 18.4/20 | Rasht, Iran

SKILLS & AWARDS

Technical Skills:

CORE: React.js, Next.js (App Router, RSC, SSR/SSG), TypeScript, JavaScript, Node.js | STATE & DATA: Zustand, Redux Toolkit, TanStack Query, SWR, GraphQL, REST APIs, WebSockets | UI & STYLING: Tailwind CSS, Material-UI (MUI), CSS Modules, Sass/SCSS, Styled Components | ARCHITECTURE: Micro-Frontend, Atomic Design, Component Libraries, Design Systems | PERFORMANCE: Core Web Vitals (LCP, INP, CLS), Code Splitting, Bundle Optimization | TESTING & TOOLING: Jest, React Testing Library, GitLab CI/CD, Vite, Webpack, Git, Figma

Languages:

English (C1, Professional Working Proficiency | TOEFL 100/120), Turkish (B1, Intermediate), German (A2, actively learning)
